Abhishek Bhattacharjee, PhD

Curriculum Vitae

Chennai, India · stat-absk.github.io · Google Scholar · LinkedIn

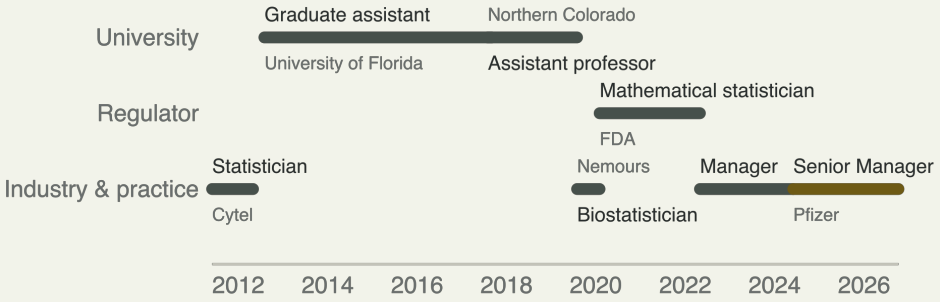

Profile

Biostatistics leader pairing hands-on industry development and FDA regulatory experience across the drug-development lifecycle with a strong academic and methodological foundation. Currently Senior Manager, Biostatistics at Pfizer (Associate Director–equivalent) and a member of the Data Science & Analytics India leadership team, leading a team of statisticians across global Oncology and Inflammation & Immunology programs. Former FDA Oncology Center of Excellence primary reviewer with hands-on NDA/BLA experience, product-labelling negotiation, and pioneering use of real-world evidence and external-control cohorts.

Core competencies

Clinical development strategy · Regulatory interactions (FDA) · Oncology & I&I trial design · NDA / BLA / IND submissions · Endpoint & estimand strategy · Real-world evidence · Target trial emulation · Bayesian & adaptive designs · People leadership & mentoring · Cross-functional influence · Reproducible workflows · Scientific publication & speaking

Experience

Jun 2024 – present

Senior Manager, Biostatistics — Pfizer Healthcare India Pvt. Ltd., Chennai, India

- Associate Director–equivalent statistical leader on the Data Science & Analytics India leadership team, shaping statistical strategy across global Inflammation & Immunology development programs.
- Lead and develop a team of statisticians — building talent, strengthening statistical capability, and fostering a culture of scientific excellence.
- Build enterprise capability in real-world evidence and target trial emulation, partnering with Statistics leadership to advance next-generation evidence generation.
- Advance modern quantitative methods across programs, including endpoint consolidation, real-time trial monitoring, and reproducible quantitative science.

May 2022 – May 2024

Manager, Biostatistics — Pfizer Healthcare India Pvt. Ltd., Chennai, India

- Trial-statistician leadership across Inflammation & Immunology programs spanning pediatric ulcerative colitis and inflammatory bowel disease, with medical-affairs support and priority programs in atopic dermatitis, asthma, and COPD — from study design through regulatory deliverables.

- Oncology statistical leadership on targeted-therapy programs across non-small cell lung cancer and melanoma, spanning protocol design, analysis planning, and submission-supporting deliverables.

Feb 2020 – Apr 2022 **Mathematical Statistician (Primary Reviewer)** — U.S. Food and Drug Administration, Oncology Center of Excellence, Silver Spring, MD, USA

- Primary statistical reviewer for NDA, BLA, and IND submissions across multiple oncology indications, delivering independent assessments that informed regulatory decisions and product labelling.
- Reviewed applications spanning gastric and gastroesophageal cancers, cholangiocarcinoma, and additional solid-tumor indications, as well as an oncology biosimilar and a supportive-care (otoprotection) program.
- Led sponsor–agency interactions and labelling negotiations, translating statistical findings into clear regulatory positions.
- Contributed to one of the FDA's early evaluations of real-world evidence and external-control cohorts through review of a pediatric neuroblastoma program.

Aug 2019 – Jan 2020 **Biostatistician** — Nemours Children's Health System, Jacksonville, FL, USA

- Led end-to-end statistical strategy for investigator-initiated pediatric studies across multiple therapeutic areas — concept and design through analysis, interpretation, and publication.

Aug 2017 – Jul 2019 **Assistant Professor of Statistics (tenure-track)** — University of Northern Colorado, Greeley, CO, USA

- Taught graduate and undergraduate statistics, mentored students, and led applied and methodological research.
- Served as statistical consultant on cross-disciplinary research collaborations across the university.

Aug 2012 – Aug 2017 **Graduate Assistant & Instructor** — University of Florida, Department of Statistics, Gainesville, FL, USA

- Instructor, teaching assistant, and statistical consultant while completing PhD research.

Jun 2011 – Apr 2012 **Statistician** — Cytel Statistical Software & Services Pvt. Ltd., Pune, India

- Supported early-stage sponsor studies through statistical programming, analysis, and study-support activities.

Education

2012 – 2017 **PhD, Statistics** — University of Florida

2009 – 2011 **MSc, Statistics** — University of Calcutta

2006 – 2009 **BSc, Statistics** — University of Calcutta

2025 **Leadership Development Programme** — IIM Ahmedabad (for Pfizer)

Professional leadership & scientific service

- Scientific Committee Member — International Indian Statistical Association (IISA)
- Council Member, Biostatistics Council — Indian Society for Clinical Research (ISCR)
- Mentor, Pfizer statistics internship program
- Biostatistics workshops — Loyola College and SSKM Hospital, Kolkata

Selected presentations

- IISA Annual Conference — 2024, 2022
- Novartis Sankhya — 2023
- International Triennial Calcutta Symposium on Probability & Statistics — 2018, 2015

- ASA Joint Statistical Meetings (JSM) — 2017

Research focus

Much of my recent work sits in two places: using **target trial emulation** to bring observational data to bear on questions trials answer slowly or not at all, and **endpoint and estimand strategy** — deciding what a trial should measure before arguing about how to analyse it.
